- **Cloud/Automation Tools:** AWS Lambda, Jenkins, Terraform
- **Scripting/Programming:** Python, Pandas, JSON handling

Project Details

Project 1: DQM (Data Quality Management Service) for Blackstone

Role: Software Engineer

Tools: Python, Pandas, Snowflake DB, AWS Lambda, Jenkins, Terraform, Git

Description: Developed a data validation service to check for nulls, duplicates, zero values, and multiple values for the same date in financial datasets. The solution extracts data from Snowflake, processes it using Pandas DataFrames, converts it into JSON format, and performs various quality checks. The service is containerized, hosted via Git and Jenkins, deployed using Terraform as an AWS Lambda function, and triggered by AWS events through an event-listener service also implemented to monitor AWS events.

Project 2: EDM & Polaris

Role: Software Engineer

Tools: ReactJS (Front-End), MVC Web APIs (Back-End)

Description: Web application to load data into the database (EDM) and render reports (Polaris).

Education

2012-2014: Intermediate (PCM) M.V.C.I.C. — Sulem Sarai Prayagraj UP 211011, CBSE Board Delhi

2014-2016: Matriculation M.V.C.I.C. — Sulem Sarai Prayagraj UP 211011, CBSE Board Delhi

2018-2022: B.Tech. CSE – Abdul Kalam Technical University Lucknow

Key Strengths

- Proactive and results-oriented team member
- Strong focus on customer and business needs and meet the provided ETA
- Effective communication across all levels
- Project management skills to ensure timely delivery
- High degree of initiative, result-driven, able to work under pressure
- Flexible and decisive as per situation demands

Personal Details

• **Date of Birth:** 05th July 1999

• **Marital Status:** Single

• **Languages Known:** English, Hindi

• **Permanent Address:** Dhangwal, Narwey, Azamgarh U.P. 276305

Declaration

I hereby declare that the above-mentioned information is true to the best of my knowledge.

Place: Noida
